

Session Program

12-18 Aug 2012

Quark Matter 2012

Parallel 1C: Correlations & Fluctuations (Chair J. Schukraft)

Tuesday 14 August

14:15

Parallel 1C: Correlations & Fluctuations (Chair J. Schukraft)

Session | Location: Diplomat

14:15–14:35

Detailed HBT measurement with respect to event plane and collision energy in Au+Au collisions at PHENIX

Speaker

Takafumi for the PHENIX Collaboration Niida

14:35–14:55

Femtoscopy of identified particles at STAR.

Speakers

Neha Shah, neha shah

14:55–15:15

Meson and baryon femtoscopy in heavy-ion collisions at ALICE

Speaker

Maciej Pawel Szymanski

15:15–15:35

Short- and long-range very-high-pT triggered dihadron correlations in PbPb collisions at 2.76 TeV with CMS

Speaker

Rylan Towne Conway

15:35–15:55

Event shape engineering with ALICE

Speaker

Alexandru Florin Dobrin

15:55–16:15

Azimuthal anisotropy of charged hadrons at very high pT in PbPb collisions at 2.76 TeV with CMS

Speaker

Victoria Zhukova

16:15
