

Session Program

12-18 Aug 2012

Quark Matter 2012

***Parallel 7E: New Theoretical Developments
(Chair P. Levai)***

Friday 17 August

16:30

Parallel 7E: New Theoretical Developments (Chair P. Levai)

Session | Location: Empire

16:30-16:50

Evolution of singularities in unequal time two-point correlator in formation of QGP

Speaker

Shu Lin

16:50-17:10

Derivation of the medium-induced splitting kernels from Soft Collinear Effective Theory with Glauber gluons

Speaker

grigory ovanesyan

17:10-17:30

Dissipative effects in multi-component systems

Speaker

Andrej El

17:30-17:50

Instantons and Sphalerons in a Magnetic Field

Speaker

Gokce Basar

17:50-18:10

Heavy quark quenching from RHIC to LHC and the consequences of gluon damping

Speaker

Pol Gossiaux

18:10
