## Search for $\tau \rightarrow \mu/e \gamma$ with the full data sample of Belle

*Friday 6 July 2012 16:15 (15 minutes)*

We search for a lepton flavor violating  $\tau$  decay into  $\mu/e$  and  $\gamma$  using the full data sample of approximately  $1000 \text{ fb}^{-1}$  collected with the Belle detector at the KEKB asymmetric-energy  $e^+e^-$  collider.
