## **Search for exotic VZ resonances decaying into a jet and dileptons with CMS**

*Saturday, 7 July 2012 18:00 (1 hour)*

We present a search by the CMS experiment for new exotic particles decaying to the VZ final state, where V is either a W or a Z decaying hadronically and the Z decays to dielectrons or dimuons. The analysis uses the full 2011 dataset at  $\sqrt{s} = 7$  TeV.
