Photon results from CDF.

Friday 6 July 2012 14:30 (15 minutes)

Prompt isolated photon pairs production cross sections, as well as direct photon production in association with a heavy (b or c) quark jets are presented. Differential cross sections are presented as a function of several variables. The results are compared with a next-to-leading order perturbative QCD calculations.

Presenter: VELLIDIS, Konstantinos (Fermi National Accelerator Laboratory (US))

Session Classification: Room 220 - Neutrinos / QCD, Jets, Parton Distributions - TR6

Track Classification: Track 6. QCD, Jets, Parton Distributions
