Beam Diagnostics and Instrumentation

Wednesday, 18 January 2006 11:45 (20 minutes)

This presentation will review the major Beam Instrumentation issues that could affect the restart and operation of the PS and SPS machines and their experimental areas in 2006. The talk will cover system modifications, upgrades and areas where just getting the old hardware working after 18 months could be a challenge.

Presenters: JENSEN, Lars; LUDWIG, Michael

Session Classification: Session 1: What Has Been Done
