Invenio User Group Workshop 2012
7-9 May 2012 / CERN

Theodoros Theodoropoulos
Library and Information Center
Aristotle University of Thessaloniki, Greece
theod@lib.auth.gr

Invenio @ AUTH ➡ "Psifiothiki"

http://digital.lib.auth.gr

❖ Academic Articles, Theses, Old and Rare Books and Manuscripts, Maps, Gravures, Photographs

❖ >126k records, 142k pdfs / 2.4m total pages, 330Gb attachments

Initial installation CDS@AUTH v0.0.9	1st record						Upgrade to v0.99.2				Upgrade to v1.x

Data points: 4K (2003), 12K (2004), 41K (2005), 65K (2006), 99K (2007), 108K (2008), 111K (2009), 121K (2010), 124K (2011), 126K (2012)

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013

❖ 780.000 visits (500.000 unique) the last 5 years

  ❖ 90% Greece, 3% Cyprus, 7% others

  ❖ 62% Google search engine, 16% Library website

  ❖ Most popular collection: Theses (Graduate/Postgrad/PhD)

Difficulties in our Invenio Installation

- Back in 2003, not the easiest to install (issues with configuration and customization). Not multilingual. Problems with non-Latin characters!
- Upgrade not straightforward for v0.99.2 (1.x upgrade expected to be easier)
- Creation of new collections, customization of forms, creation of extraction templates
- Access rights management
- Customization of statistics
- User-selectable time based release of attachments
- Access restrictions for records and attachments

But thumbs up for:

- 👍 Robustness! NEVER broke badly
- 👍 Very responsive search for the given resources
- 👍 Super customizable
- 👍 Highly helpful and responsive dev team

Main expectations from the workshop

- Learn how to extend and optimize the use of Invenio. Best practices – new features
- Create 'Author profiles', use author IDs and authority records
- Manage users and user roles
- Shibboleth authentication
- Use knowledge bases in search/submit
- Strengthen the collaboration between Invenio admins
- Meet with Invenio team and learn about future Invenio development plans

Invenio User Group Workshop 2012
7-9 May 2012 / CERN

Thank you!
