

Invenio at National Technical Library, Prague (techlib.cz)

Jana Sloukova

jana.sloukova@techlib.cz

National Technical Library

Invenio #1: IDR

210 mm

- IDR = Institutional Digital Repository
- repozitar.techlib.cz
- documents produced by library staff: reports, conference materials, press releases, ...
- currently ~ 350 records, submitted by IDR curator

Invenio #2: NGLR

210 mm

- National Grey Literature Repository
- aim: collecting GL from various czech institutions (universities, research institutes, libraries) and making them available for public at one place
- invenio.nusl.cz
- document types: theses, conference papers, reports
- around 103 000 records, often only harvested metadata

Modifications: conversion

210 mm

- my ex-colleague didn't like any of Invenio conversion options (XSLT, BFT)
- => he wrote Python script for parsing records in XML format, object model of record
- used also for processing of user input from WebSubmit module and generally manipulating with records

Expectations

210 mm

- learn more about Invenio and its possibilities
 - improve my knowledge of modules which we use
 - discover the parts which I didn't come across yet
