BibSort – the concept

example: sort by titles A-Z

- Processing phase -> generate the ‘Sorting Buckets’

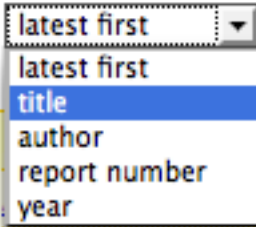

`CFG_BIBSORT_BUCKETS = 5`

BibSort – the concept

- *Search time (display first 10 records that contain ‘ellis’ sorted ascendant by title)*

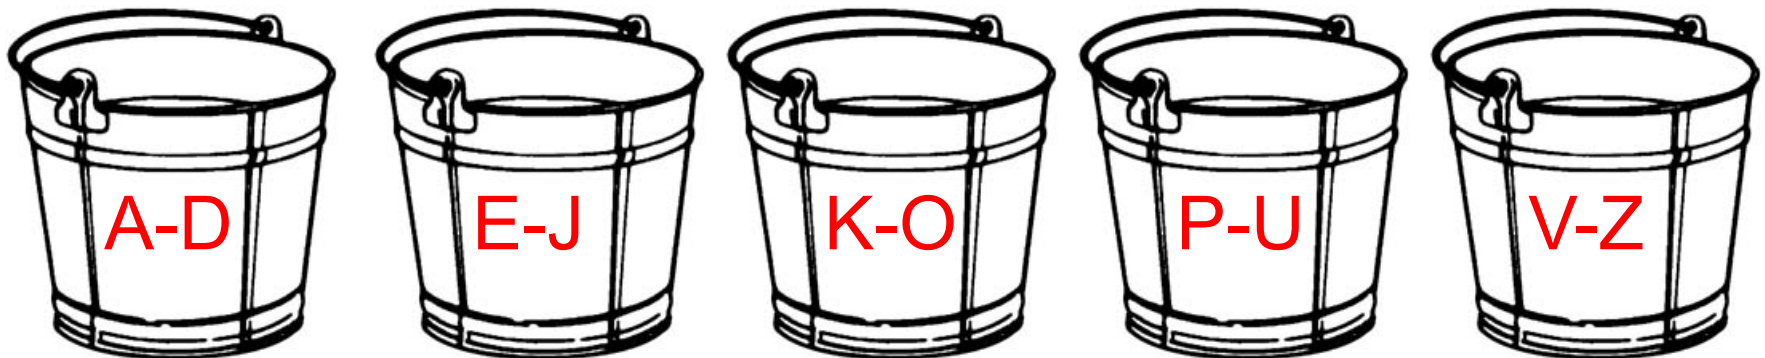

Search:

Sort by:

[Search Tips](#) :: [Advanced Search](#)

=> 37 results

8 matches

< 10.. continue

7 matches

=15 > 10 so STOP!
