Type: **Talk in Parallel Session at DIS2013**

## **Search for heavy resonances with the ATLAS detector**

*Wednesday 24 April 2013 14:20 (20 minutes)*

Resonances decaying into a pair of particles are an obvious place to look for phenomena beyond the Standard Model.

This talk summarizes recent results on searches for resonances in pairs of jets, lepton pairs, leptons and missing transverse energy and pairs of photons. Various models are considered such as the  $Z'$  and  $W'$ , the Randall-Sundrum gravitons as well as the ADD large extra dimension scenario, excited quarks, quantum black hole and contact interactions. Results from  $\sqrt{s} = 8$  TeV are presented.
