Searches for gluino-mediated production of third generation squarks with the ATLAS detector

Tuesday 23 April 2013 17:30 (20 minutes)

Naturalness arguments for weak-scale supersymmetry favour supersymmetric partners of the third generation quarks with masses not too far from those of their Standard Model counterparts. Real and virtual production of third generation squarks via decay of a gluino can be significant if the mass of the gluino does not exceed the TeV scale. The talk presents recent ATLAS results from searches for gluino mediated stop and sbottom pair production.

Author: Prof. OREGLIA, Mark (University of Chicago (US))

Presenter: DELUCA, Carolina (NIKHEF (NL))

Session Classification: WG3: Electroweak and Searches

Track Classification: Electroweak Physics and Beyond the Standard Model
