

# **XXI International Workshop on Deep-Inelastic Scattering and Related Subjects**

**Monday, 22 April 2013 - Friday, 26 April 2013**

**Marseille, Parc Chanot**

## **Scientific Programme**

The conference includes an unique mix of communities and covers a large spectrum of topics in high energy physics. A significant part of the program is devoted to the most recent and exciting results from large experimental installations at CERN, DESY, Fermilab, Jefferson National Laboratory, Brookhaven National Laboratory etc. The theoretical advances are included as well and contribute to the unique and vibrant scientific atmosphere of this workshop. The program will be organised around seven tracks:

## **Structure functions and Parton Densities**

## **Small-x, Diffraction and Vector Mesons**

## **Electroweak Physics and Beyond the Standard Model**

## **QCD and Hadronic Final States**

## **Heavy Flavours**

## **Spin Physics**

## **Future experiments**
