

Enabling Grids for E-science

How to protect proxies?

Gergely Debreczeni

EGEE conference 2007, Budapest

- *More and more site -> cannot ensure that all of them is configured safely and well-protected.*
- *It is not the Middleware which is the potential target, but much more the
 - o *errorneous deployment, configuration procedures and operational issues*
 - o *3rd party software like batch systems, monitoring services, etc...**

Problem: Once a proxy is stolen the gates are open....

Enabling Grids for E-science

There are long term solutions already discussed/agreed (?), but what we can do NOW ?

Question: Is there any way to improve this situation in the short term ?
