- **Further information: This will be available in October**
  http://egee-docs.web.cern.ch/egee-docs/meetings-conferences/Face-to-face_ROC_meetings/lyon-2008/lyon-2008.html

- **Organisers: Rolf, Helene, Alistair**

- **Questions, comments**

eGee

Enabling Grids for E-sciencE

- This release contains an incompatibility to deal with new ticket states

- There is also a mod to change field names in ticket exchange

- All ROCs must be ready before we can upgrade

- These are not big changes, but I feel the need to be cautious

- We would like to do this in November (it was proposed for September)

- We want each ROC to nominate a ROC coordinator to deal with the upgrade (1-2 days of work)

- We want each ROC to commit to doing the upgrade and the service verifications

- The test/ training system is available now for testing

- There will be several two rounds of service verification on the test system, and one on the production system

- We want to test this as soon as possible with two volunteers (UK and CERN?)

- There is a written plan for the upgrade

- The plan for the service verification has yet to be updated from the one in December 2005

- GGUS will not introduce another incompatible release for at least one year

- Questions, comments, committments!
