

European Grid Initiative

# EGI\_DS: WP3

## Definition of Tasks

...and an invitation to participate  
in tomorrow's EGI workshop...

# WP3: EGI functionality definition

- *“The main goal of WP3 is the definition of the functions to be attributed to EGI (considered here as an example of a European Organization having the NGIs as stakeholders) and the elaboration of a working model between EGI and NGI(s) with its evolution in time, to ensure the future sustainability of the EU e-infrastructure.”*

# Overview of WP3 Tasks

- T3.0: WP3 coordination (**INFN**)
- T3.1: m/w development, building & testing, standard(s) compliance and interoperability
  - **INFN**, CERN, CESNET, SFTC
- T3.2: components selection, validation, integration, deployment, e-infrastructure operation, service quality definition for NGIs & EGI
  - **CERN**, INFN, SFTC, DFN, CESNET, CNRS, GRNET
- T3.3: outreach, dissemination & training, industry take-up, contribution to OGF etc, policy & representation of NGIs, international cooperation, eIRG and ESFRI
  - **INFN**, CESNET, GUP, GRNET, CSC, SFTC

# My thoughts... (re T3.2)

- Start with the **service** – this has a strong impact on all other aspects of this task
- Invite experts to contribute to knowledge base
  - See EGI workshop on Tuesday
  - I am waiting, willing and wanting to help coordinate this activity
- Goal: all existing (documented) experience added to / referenced from KB by year end
- Early 2008: focussed workshop for those who contributed and those who wish they had to **consolidate** (not input) the ‘knowledge’ according to the agreed themes
- EGI\_DS WS2 will be in H1 March (to avoid Easter) in Padua/Padova
- Hence the “T3.2 consolidation workshop” must produce clear proposals
  - What is “agreed”;
  - What needs more discussion;
  - What needs more work.

# The Cuckoo's Egg

- *“If you didn't write it you didn't do it...”*
