

## **Session Program**

**19-21 Apr 2006**

## **SpacePart '06**

### ***Space Telescopes***

Ruxin Conf. Center, Beihang University, Beijing  
Beijing, China

# Thursday 20 April

14:00

## Space Telescopes

**Session** | **Location:** Ruxin Conf. Center, Beihang University, Beijing, Beijing, China

14:00–14:25

### Latest results from the INTEGRAL space telescope

#### Speaker

Dr Nicholas Produit

14:25–14:50

### Gamma ray burst discoveries with the SWIFT mission

#### Speaker

Dr F. Marshall

14:50–15:15

### Future X-ray telescopes in ESA

#### Speaker

Dr L. Piro

15:15–15:35

### Gamma ray physics with GLAST

#### Speaker

Dr Claudia Cecchi

15:35–15:55

### PLANK satellite constraints on particle physics with the measurement of CMB polarized anisotropies

#### Speaker

Dr Francois Xavier Désert

15:55–16:20

### HXMT-A Chinese high energy astrophysics mission

#### Speaker

Dr Li Tipei

16:20–16:40

### Symbol X: a formation flying mission for hard X-ray astronomy

#### Speaker

Dr P. Caraveo

16:40–17:00

### On the modern concept of a multipurpose orbital observatory for direct study of high energy cosmic rays

#### Speaker

Dr R. Mukhamedshin

17:00
