

Fifth CW and High Average Power RF Workshop

Friday 28 March 2008

Friday morning - 40-S2-C01 (09:00 - 12:40)

time	[id] title	presenter
09:00	[15] High power, wideband, solid-state amplifiers for LEIR and J-PARC RF systems.	Mr PAOLUZZI, Mauro
09:40	[12] RF Tests of Chemical Additives for Water Cooled RF Loads	Dr YOUNG, Karen
10:20	[28] New IPA Design for 500 MeV TRIUMF Cyclotron	Mr MITRA, amiya
11:00	Coffee break	
11:15	[25] CEA-Saclay high voltage modulator for pulsed klystrons	Mr HAMDY, Abdallah
11:55	[34] Update of Operating Experience and Reliability of Klystrons at Jefferson Lab	WALKER, Richard
12:35	[39] Short session on "Development of power amplifier modules for the ACOL stochastic cooling systems"	Dr CASPERS, Fritz
