

Fifth CW and High Average Power RF Workshop

Tuesday 25 March 2008

Tuesday afternoon - 40-S2-C01 (14:00 - 18:25)

time	[id] title	presenter
14:00	[4] Performance Of the Advanced Photon Source 350-MHz 1MW CW Klystrons	Mr HORAN, Doug
14:40	[8] CERN SPS 200MHz/4MW tetrode power amplifier	Mr MONTESINOS, Eric
15:20	[31] Implementation of new 352 MHz RF amplifiers and cavities in the frame of a general upgrade of the ESRF	Mr MERCIER, Jean-Maurice Dr JACOB, Jörn
16:00	break	
16:15	[38] Operational experience with the SOLEIL 352 MHz RF systems	Mr MARCHAND, Patrick
16:35	[26] High Power Solid state amplifiers for the SOLEIL Synchrotron	Mr RUAN, Ti
16:55	[30] 500MHz Solid State Power Amplifier Development at PSI - Preliminary Results	Mr GASPAR, marcos
17:35	[7] RF Power improvement of AlGaIn/GaN based HFETs and MOSHFETs	Mr FOX, Alfred
