

Pre-GDB on CE Extensions Introduction

Davide Salomoni, INFN
July 9, 2012

Agenda, logistics

- Agenda
 - Moved IS presentation by Maria ahead of the CE discussions
 - Brian Bockelman will present OSG views in the afternoon connecting from the US
- Logistics
 - Need to write minutes: **volunteer?**
 - A summary of this meeting will be presented tomorrow at the GDB
 - Will define a mailing list to follow discussions/actions up if deemed appropriate

Goals / Non-goals of this meeting

- **Goals**

- Review the proposed CE extensions and focus on the whole-node /multi-core extension set
- Come up with an agreed development plan and a timeline for the implementation of CE extensions (with as many CE technologies as possible)

- **Non-goals**

- Solve (all) implementation issues today – rather, identify areas and task people/groups to work on them.
- Discuss details about other CE extensions (like streamed submissions or I/O vs. CPU tagging) – we'll likely need other meetings for that.
