

Session Program

28 June 2012 to 4 July 2012

**International Conference on New Frontiers in
Physics**

Tuesday Parallel IV

Kolymbari, Crete, Greece

Saturday 30 June

18:10

Tuesday Parallel IV

Session | Location: Kolymbari, Crete, Greece

18:10-18:35

Status and developments of Advanced Ligo and Advanced Virgo gravitational wave detectors

Speaker

Enrico Calloni

18:35-19:00

Pre-Big Bang, fundamental Physics and noncyclic cosmologies

Speaker

Luis Gonzalez Mestres

19:00-19:25

The Telescope Array - Ultra High Energy Cosmic Rays

Speaker

John Matthews

19:25-19:50

Listening to the Universe with gravitational-wave interferometers: Recent observational results from LIGO and Virgo

Speaker

Brennan Hughey

19:50-20:15

no title

20:40
