Cyber security update

Thursday 18 October 2012 15:00 (30 minutes)

This talk gives an update on security trends, and issues affecting computers, software applications and networks during the last months. It includes information on emerging types of vulnerabilities and recent attack vectors, and provides an insight into the cyber-security world of 2012. New security tools developed at CERN will also be presented.

This talk is based on contributions and input from the CERN Computer Security Team.
