

# 21st RD50 Workshop (CERN)

## Thursday 15 November 2012

### Full Detector Systems (15:30 - 19:20)

-Conveners: Gregor Kramberger

time	[id] title	presenter
15:30	Coffee Break	
16:00	[6] A Portable Telescope Based on the Alibava System for Test Beam Studies	LOZANO FANTOBA, Manuel
16:20	[38] Update on thin sensors results (will be shown on Friday afternoon in PPS meeting)	Dr CASSE, Gianluigi
16:35	[36] Charge Collection measurements of n-in-p strip detectors after mixed irradiation to HL-LHC fluences and annealing	KUEHN, Susanne
16:55	[48] Bias effects in highly irradiated n+-p silicon microstrip detectors after long term annealing	MILOVANOVIC, Marko
17:15	[19] A Charge Collection Study with Dedicated RD50 Charge Multiplication Sensors	BETANCOURT, Christopher
17:35	[39] Investigation of Charge Multiplication in Silicon Strip Sensors	EBER, Robert
17:50	[14] Status of the RD50 funding request for "detectors with enhanced multiplication"	PELLEGRINI, Giulio
18:10	[33] Punch through protection of heavily irradiated ATLAS07 mini-sensors.	Dr BOHM, Jan
18:30	[46] Discussion on Full Detector Systems	KRAMBERGER, Gregor
