

Session Program

8-12 May 2006

**Workshop on Collider Physics (Argonne &
University of Chicago)**

QCD and beyond

Argonne National Laboratory, F108
Bldg. 362 Argonne, IL 60439 USA

Thursday 11 May

13:30

QCD and beyond

Session | Location: Argonne National Laboratory, F108, Bldg. 362 Argonne, IL 60439 USA

13:30-14:00

Unintegrated parton densities: Why do we need them? What are they good for?

Speaker

John Collins

14:15-14:45

Photon pair production at the Tevatron and LHC

Speaker

Pavel Nadolsky

15:00-15:15

Coffee break

15:15-15:45

QCD corrections to Higgs and vector boson production

Speaker

Carlo Oleari

16:00-16:30

Bard: an algorithmic solution to the LHC interpretation problem

Speaker

Bruce Knuteson

16:45
