  - demo
- Q&A

## **PSS** Session Manager

- Simple tool developed at CERN to look at and manage your sessions.
- It allows users to:
  - see a list of your sessions,
  - look at sessions' details:
    - SQL being processed,
    - lock held by other sessions.
  - kill your sessions.

## Session Manager (demo)

# PSS 3D Monitoring

- Complex 3D databases and streams monitoring tool developed at CERN
- It allows users to:
  - monitor 3D database status, availability, memory usage, load, etc.
  - monitor streams health, performance, diagnose errors
  - retrieve streams performance graphs over chosen period of time

CERN - IT Department CH-1211 Genève 23 Switzerland www.cern.ch/it
