Mind the Gap

Tuesday 27 November 2007 11:10 (30 minutes)

What can we do to prevent cracks opening (or widening) in the services?

<P> Specific examples from recent times (i.e. during EGEE '07) include: <UL> <LI>SAM unavailability <LI>GridView - change of availability algorithm <LI>LFC - affected by Oracle client bug in 'old' versions </UL> <P> More communication and better planning would likely help. How (concretely) do we fix these problems before the deluge of data arrives?

Session Classification: WLCG Operations - What is Required to support LHC experiments?
