

- **Production jobs**
 - **Submitted by production shifter to DIRAC**
 - ↳ Using his/her own credentials (role=production)
 - **Pilot job for production jobs submitted using a single DN**
 - ↳ Currently also role=production
 - ↳ We have asked sites to allow role=pilot for these jobs
 - **Actual job runs using the submitter's credentials**
 - ↳ Uses the proxy handling certified by the WG
- **User (analysis) jobs**
 - Submitted using the user's credentials
 - Pilot submitted using the user's credentials
 - Actual job runs using the pilot's credentials
 - ↳ Hence fulfilling security
- **Private vs generic pilots**
 - Can be enabled per job type using the DIRAC configuration

- **Permission requested in June for running test in July**
- **Tests postponed due to:**
 - **Lack of manpower for porting ganga to DIRAC3**
 - ↳ **Severe accident of the developer**
 - **Whole team busy dealing with production matters**
 - ↳ **File access / storage permanent problems**
 - ↳ **WMS screwing up credentials between production and SAM job**
 - ↳ **... and some holidays!**
- **Current status:**
 - **First analysis jobs running**
 - **Ganga should be ready end of September**
 - ↳ **Propose to run the generic pilots test in October**
- **glexec on PPS**
 - **Got interactive access on PPS last week**
 - **Needs one day for testing glexec usage**
 - ↳ **Will be done ASAP but still low manpower...**
