## Release policy

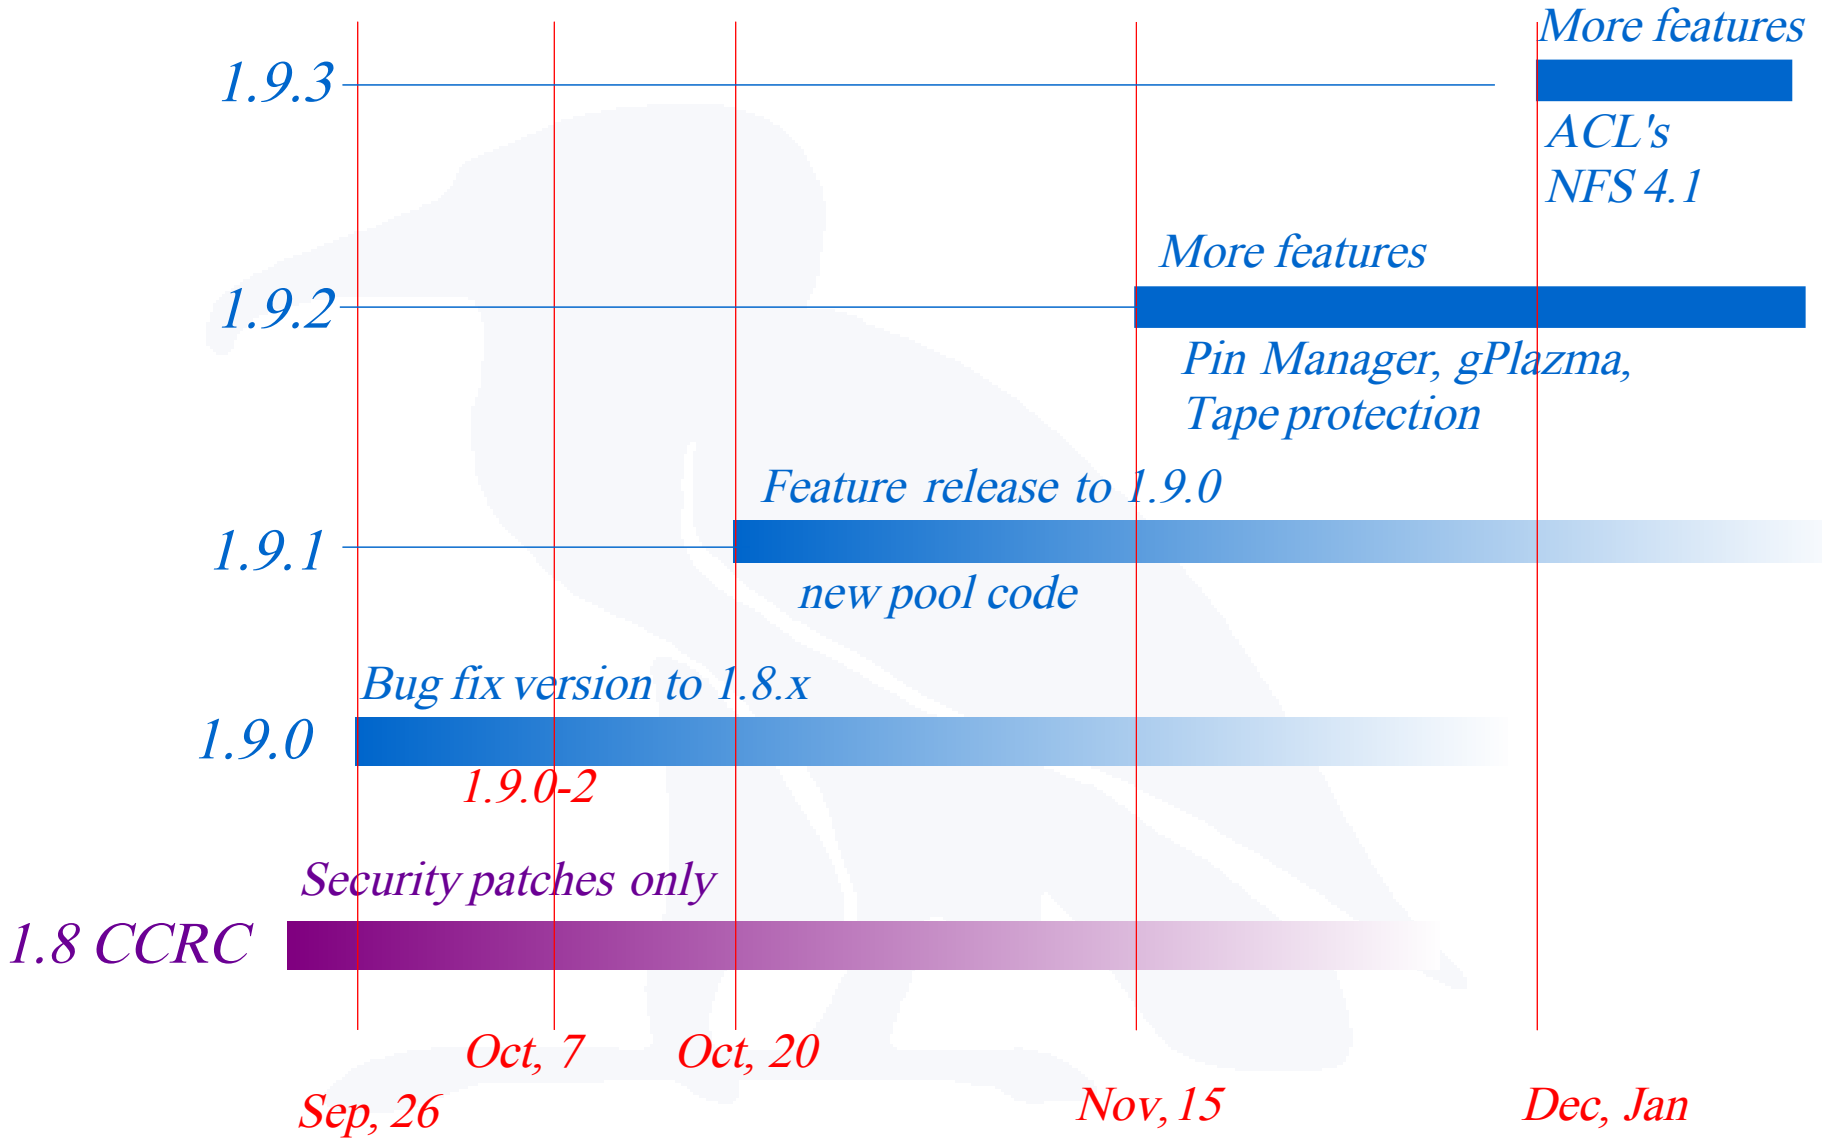

- › The 1.8.x CCRC release series will only get security fixes from now on.
- › 1.9.0 is available by Oct 8.
- › With 1.9.0 we provide detailed 'release notes' in addition to the already known 'change logs'. Please check the dCache.org download area.
- › 1.9.0 is a low risk upgrade from 1.8.x because it's just a bug fix version from 1.8.x
- › 1.9.1 and higher will contain the actual new features. (see following slides)
- › Simplified release naming convention : 1.9.x-y is the y patch to release 1.9.x. (Shorter names)
- › We encourage sites to upgrade to the 1.9.0 at least.

*As soon as we have proven that 1.9.0 is stable and behaves well, support for 1.8 will be terminated.*

# 1.9 Release policy (details please see next slide)

dCache.ORG
