## CMS results on SUSY/Beyond SM

*Thursday 22 November 2012 11:00 (30 minutes)*

To this date CMS has performed a wide range of searches for physics beyond the standard model. The program comprises both broad, inclusive searches as well as exclusive, specialised approaches. In this overview talk, the results with proton-proton collision data both at 7 and 8 TeV will be summarized, with a focus on presenting some highlights of the CMS search program.
