

EMI SA2 Report

Eamonn Kenny, TCD

SA2 Metrics and Reports, Task Leader

Presented by Duarte Meneses, CERN

Giuseppe Fiameni, CINECA

SA2 Quality Control, Task Leader

EMI AHM, Budapest, Oct 2012

- Little development required since metrics should be in place before year 3 start.
- Mostly metrics monitoring for the majority of year 3.
- Summary of past 6 months:
 - Change to Dashboard for Year 2 review
 - Metric generation for period reports
 - Lintian Analyser
 - Rpmlint Analyser with 2011 comparison

Dashboard highlights the Immediate/High Priority RfCs in state Open per Product/Tracker

Collecting all the Lintian Reports into one location to provide an overview per Product.

Detailed Lintian report for each EMI package: [CLICK HERE](#)

260 packages analyzed.

4 tables generated. These tables as CSV: [lintian.csv](#)

Total of 36 Products affected. 5 components failed to be mapped to a product.

| Product | Number of Packages | Number of Errors | Number of Warnings |
|----------------|--------------------|------------------|--------------------|
| AMGA | 1 | 2 | 2 |
| APEL publisher | 2 | 5 | 4 |
| ARC | 5 | 4 | 2 |
| ARGUS | 12 | 32 | 40 |
| ARGUS EES | 11 | 4 | 8 |
| BDII Core | 2 | 4 | 4 |
| BDII Site | 1 | 2 | 3 |

Lintian Analyser Overview

| Number Of Different Errors (N) | Number of Packages (P) | Percentage of Total Packages ($P/260*100$) |
|--------------------------------|------------------------|--|
| 0 | 86 | 37.5% |
| 1 | 73 | 31.8% |
| 2 | 36 | 15.7% |
| 3 | 27 | 11.8% |

| Number Of Different Warnings (N) | Number of Packages (P) | Percentage of Total Packages ($P/260*100$) |
|----------------------------------|------------------------|--|
| 0 | 102 | 25% |
| 1 | 68 | 26.15% |
| 2 | 42 | 16.15% |
| 3 | 20 | 12.3% |

Lintian Analyser Overview

| Ranking | Name of Error | Percentage of compliance if the errors are fixed |
|---------|------------------------------------|--|
| 1 | no-copyright-file | 37.5% |
| 2 | extended-description-is-empty | 40.6% |
| 3 | helper-templates-in-copyright | 53.7% |
| 4 | non-standard-toplevel-dir | 79.6% |
| 5 | description-synopsis-is-duplicated | 82.1% |

Rpmlint Comparison (Dec 2011)

The improvement is large whilst almost doubling the number of RPMs

| Number Of Different Errors (N) | Current Values Number of Packages (P of 1051) | Prev. Values (9 th Dec 2011) Number of Packages (P of 635) |
|--------------------------------|---|---|
| 0 | 36.5% (384) | 0.0% (0) |
| 1 | 31.8% (334) | 4.3% (27) |
| 2 | 15.6% (164) | 39.1% (248) |
| 3 | 6.4% (68) | 17.3% (110) |
| 4-5 | 7.0% (74) | 23.3% (148) |
| 6-13 | 2.5% (27) | 14.5% (92) |

Factors affecting compliance:

- Some packages are not intended to be in EPEL (either technical limitations or PT's option)
- There are some false errors

Rpmlint Analyser (Warnings)

| Number Of Different Warnings (N) | Number of Packages (P) | Percentage of Total Packages ($P/1051 * 100$) |
|----------------------------------|------------------------|---|
| 0 | 17 | 1.6% |
| 1 | 105 | 10% |
| 2 | 209 | 19.88% |
| 3 | 262 | 24.93% |
| 4 | 196 | 18.65% |
| 5 | 103 | 9.8% |
| 6 | 76 | 7.23% |
| 7-16 | 83 | 7.9% |

Quality Control – Task 2.7

- Verification of released products
- Static analysis of product packages
- Reporting of quality performance

How do we verify products?

- Products passing the first step are moved to “Ready for Testbed”
- While products are checked on EMI testbed, PTs have the opportunity to fix any minor non conformity
- Products passing the test-bed checks are moved to “Deployed on Testbed”
- If all minor nonconformities have been fixed, the product is eventually **verified** ;)
- Not addressed nonconformities are discussed again with PTs so to find out possible solutions for them

| ■ Yes | 74% | 100% | 95% | 100% |
| ■ No | 26% | 0% | 5% | 0% |
| ■ # of products | 57 | 35 | 40 | 15 |

EMI 2: RfC correctly listed

RfC Correctly listed for EMI 2 and its updates

Associated Tests Defects – EMI 1 & 2

Number of Associated Tests for High/Immediate Priority Defects in EMI-1 Major release + Update 1-19

EMI 1 release 9-19 show complete enforcement of SA2.2 policies, paramount for EMI reviews

Number of Associated Tests for High/Immediate Priority Defects in EMI-2 Major release + Update 1-3

EMI 2 release 1-3 show complete enforcement of SA2.2 policies, 2 issues in EMI 2 Major Release

Associated Tests Features – EMI 1 & EMI 2

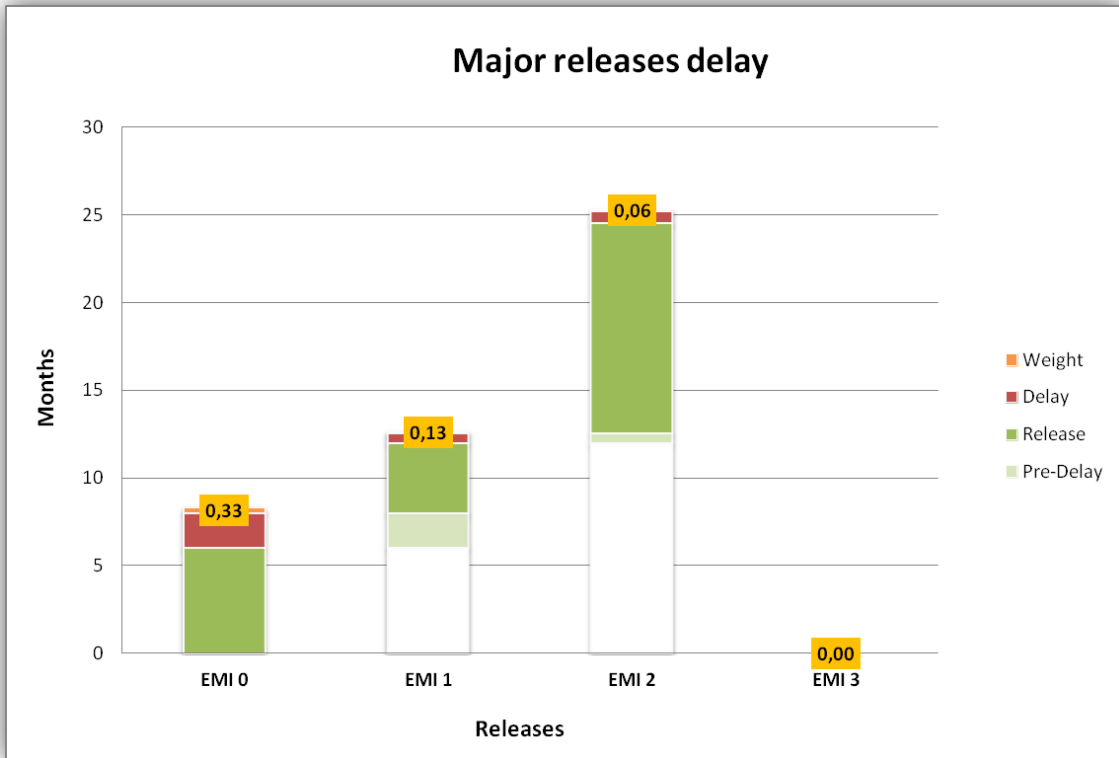

Number of Associated Tests for High/Immediate Priority Features in EMI-1 Major release + Update 1-19

Number of Associated Tests for High/Immediate Priority Features in EMI-2 Major release + Update 1-3

Major releases delay

- The results of documentation review are collected in the verification dashboard i.e. they are easily accessible for PTs.
- Common issues:
 - disagreement between information in certification report and actual documentation status
 - some of PTs do not provide the documentation in appropriate format (EMI project logo is missing, formatting of document, ...)
 - in some cases a lack of the effort to correct documentation incidents

- Overall verification results are good
- New developments (e.g. EMI 2) report better performance on test availability than previous ones (e.g. EMI 1 Updates)
- Level of conformity with EPEL policy is increasing slowly **despite the final goal (100%) is within our grasps**
- Number of defects per quarter is decreasing over quarters
