

Outreach Highlights

Dave Barney

Visits to point 5

- Underground visits in full swing
- Training and seminar for guides in July
- Visitors gallery much improved with sub-detector pieces
 - ECAL crystals, alveolar, preshower sensor
 - Tracker rod
 - Magnet section
 - Muon chambers
 - **Need something for HCAL**
- A lot of work by Beatrice Bressan

Cosmic Ray Interactive Laboratory

- CRiL delivered to CMS a couple of weeks ago and installed in the visitors gallery
 - Constructed largely by two high school students and one teacher from the US – part of the Quarknet program, based at Notre Dame
 - Two sets of scintillators; can be rotated to look at cosmic ray flux as a function of angle etc.
 - Touchscreen interactive display etc.

Cosmic Ray Interactive Laboratory – the team

Cosmic Ray Interactive Laboratory

Recent presentations

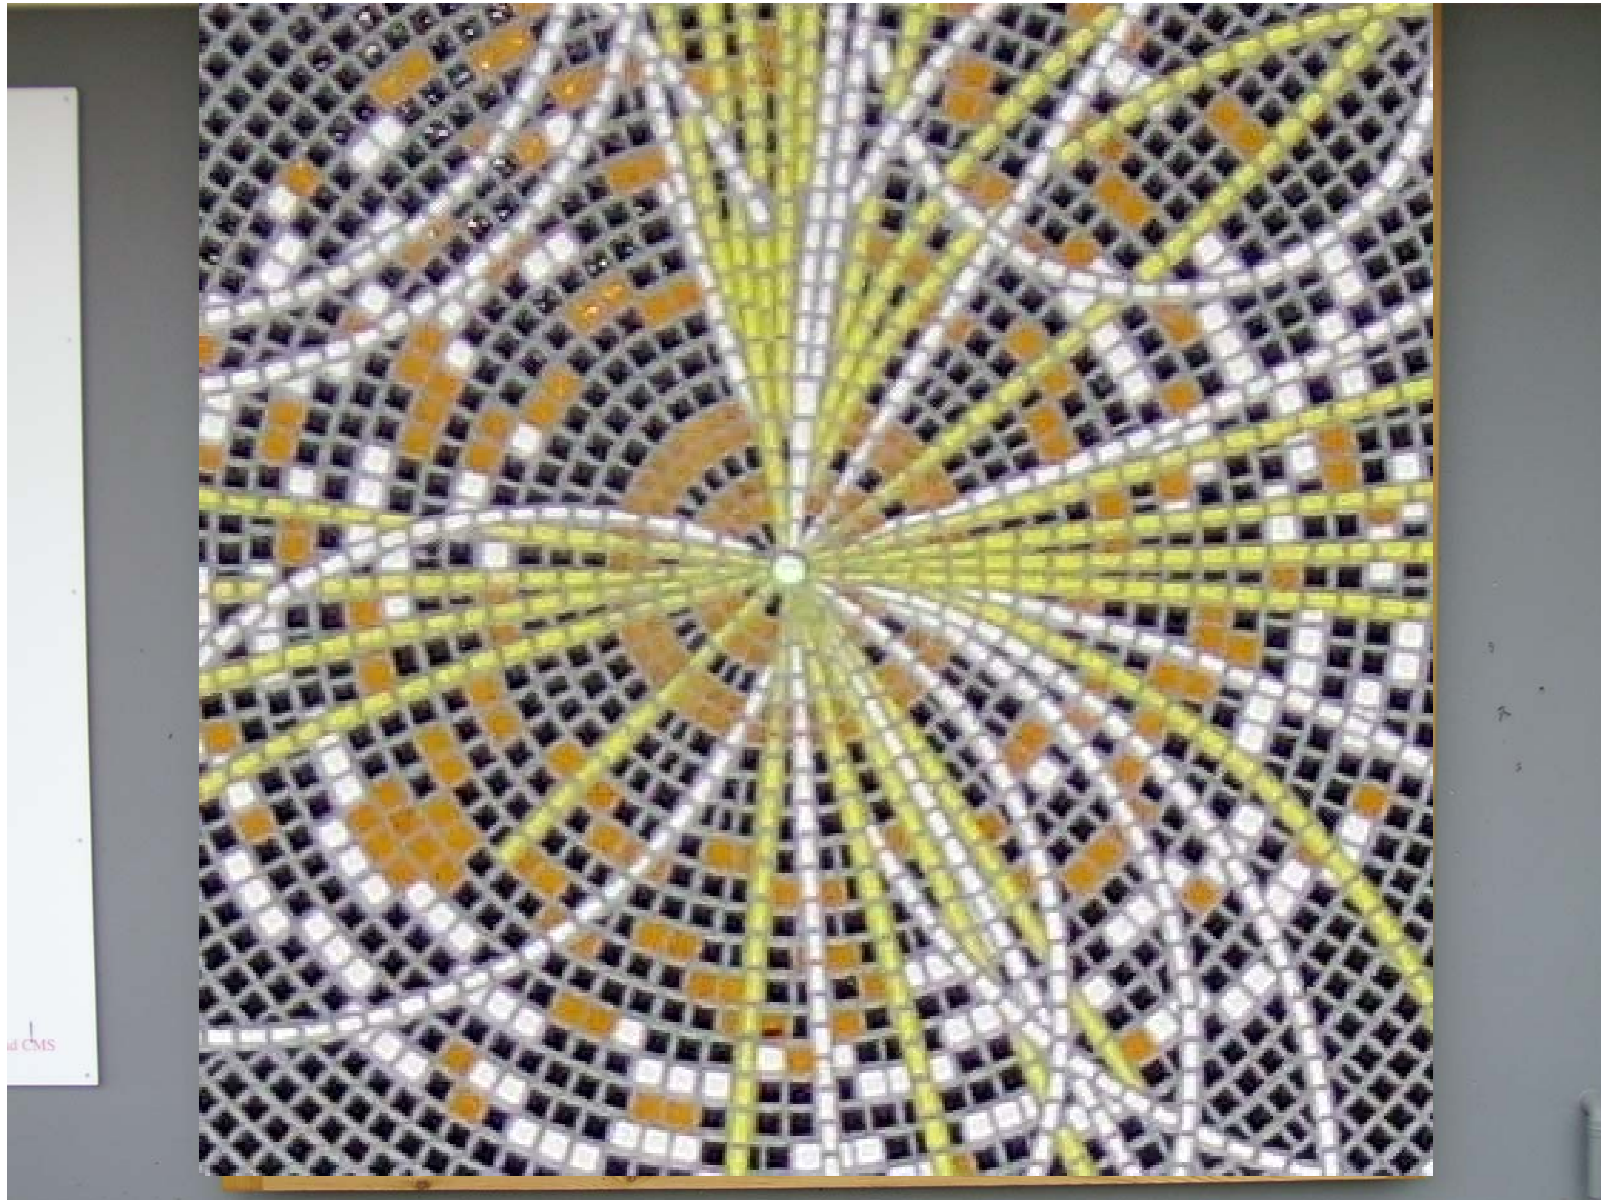

Claire Timlin (ICL) at the BA Festival of Science, UK

Freya Blekman (Cornell) at the EuroForum in Valencia

CMS Mosaic – made in UK by a teacher

New web site progressing

- Marzena working hard!
- <http://cms-project-cmsinfo.web.cern.ch/cms-project-cmsinfo/home.html>

And finally....

- I will be taking a less prominent role in CMS Outreach from now on (sure I've said this before 😊)
 - Still coordinate CMS Times and public web site – not so much for me as Marzena does all the hard work!
- Carlos Laurencio will become my official deputy and take over many responsibilities
