

# WLCG Status

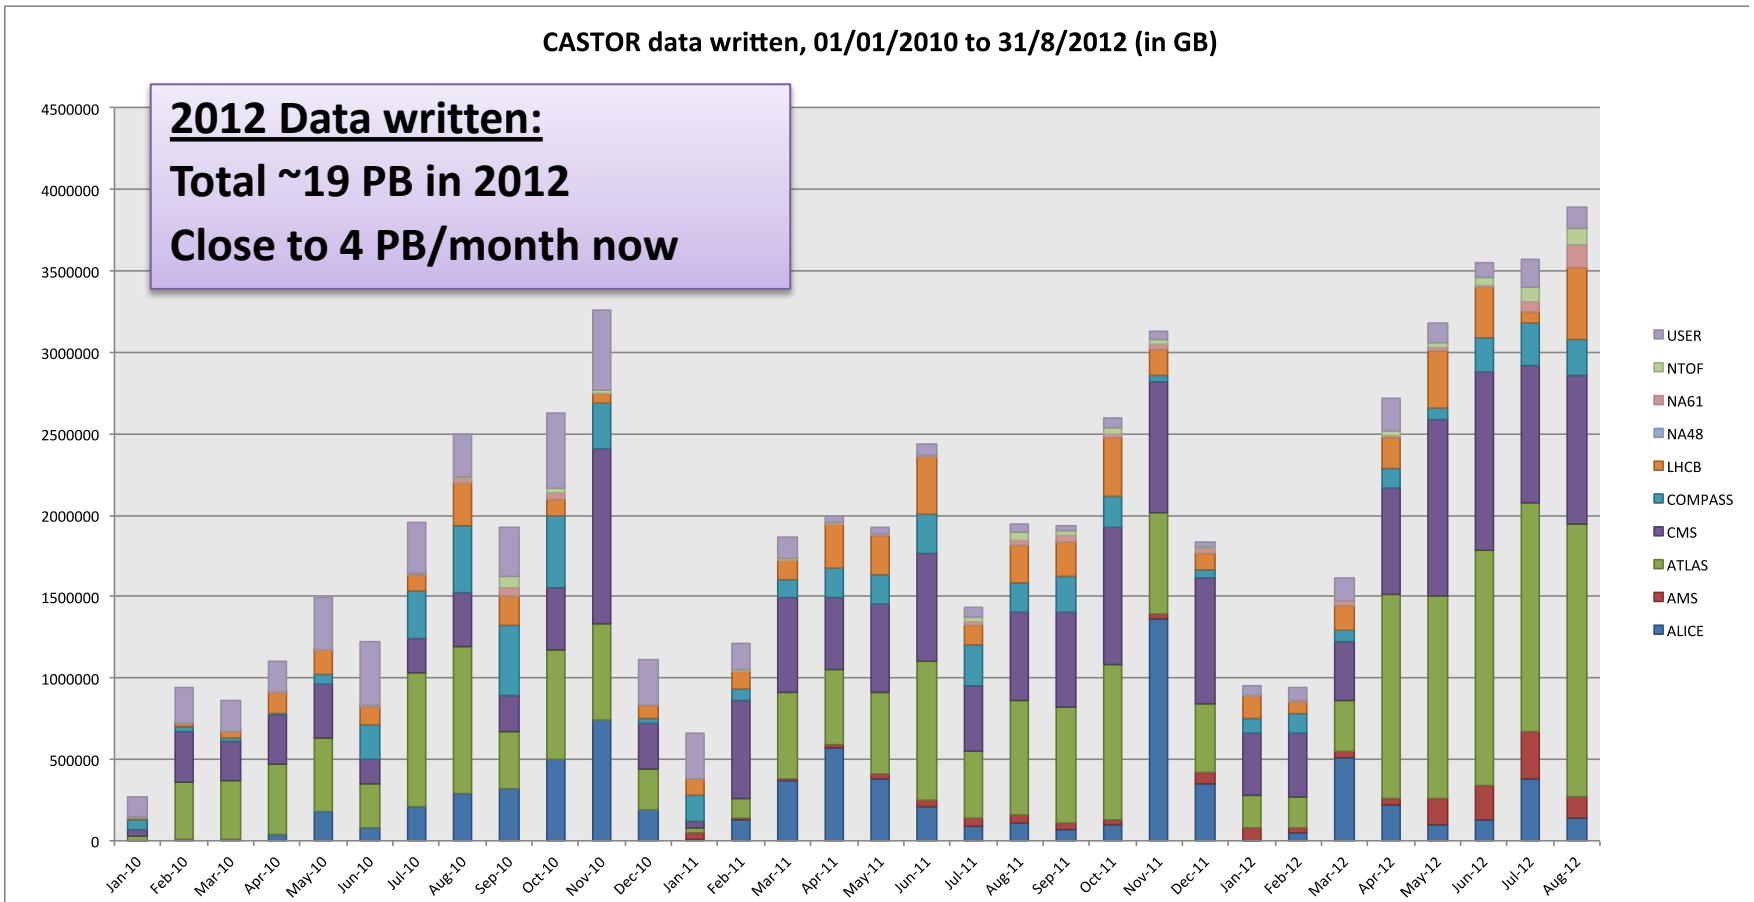

Ian Bird; WLCG Project Leader

## LHCC Referees Meeting

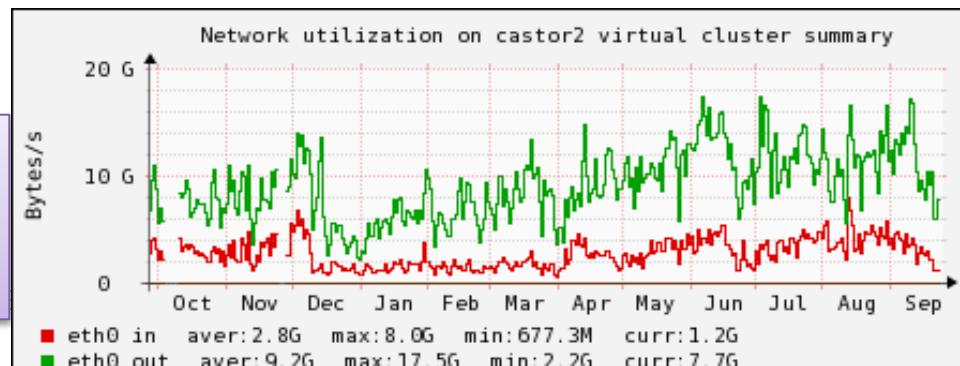

25<sup>th</sup> September 2012

# Castor data written 2010-12

Data rates in Castor increased  
3-4 GB/s input  
~15 GB/s output

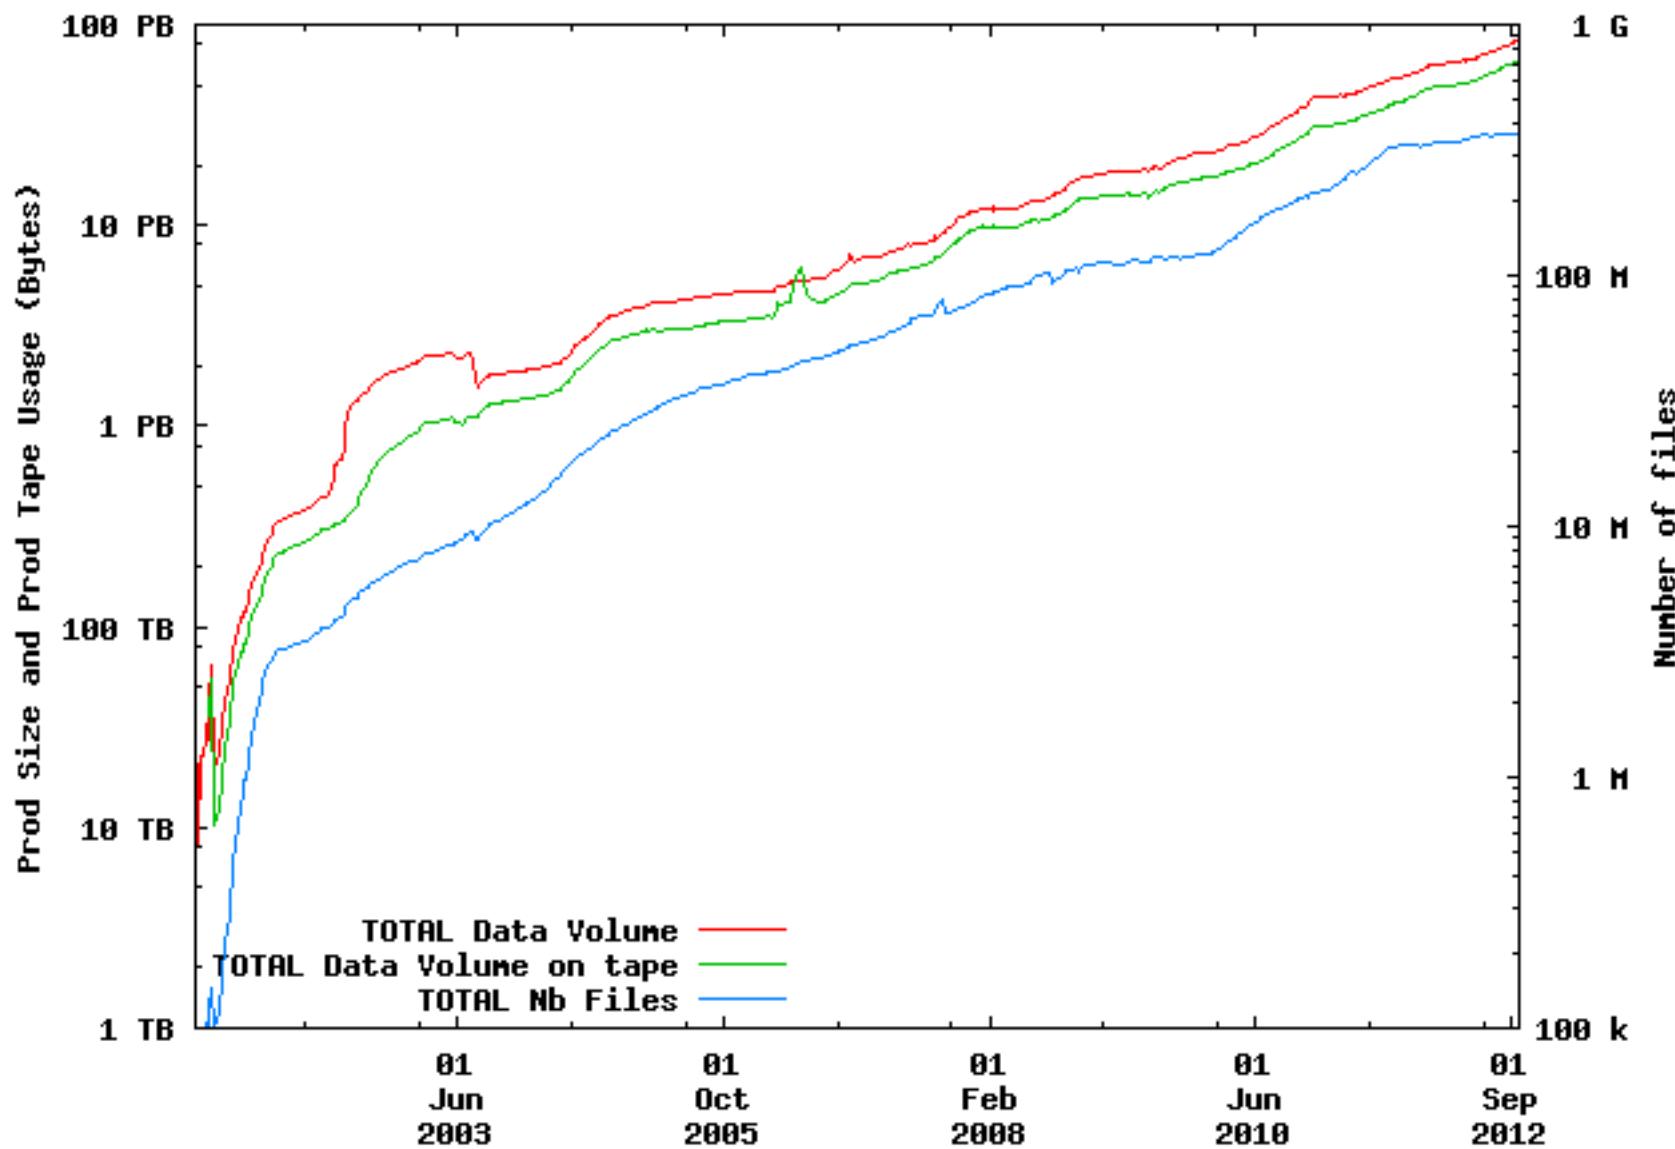

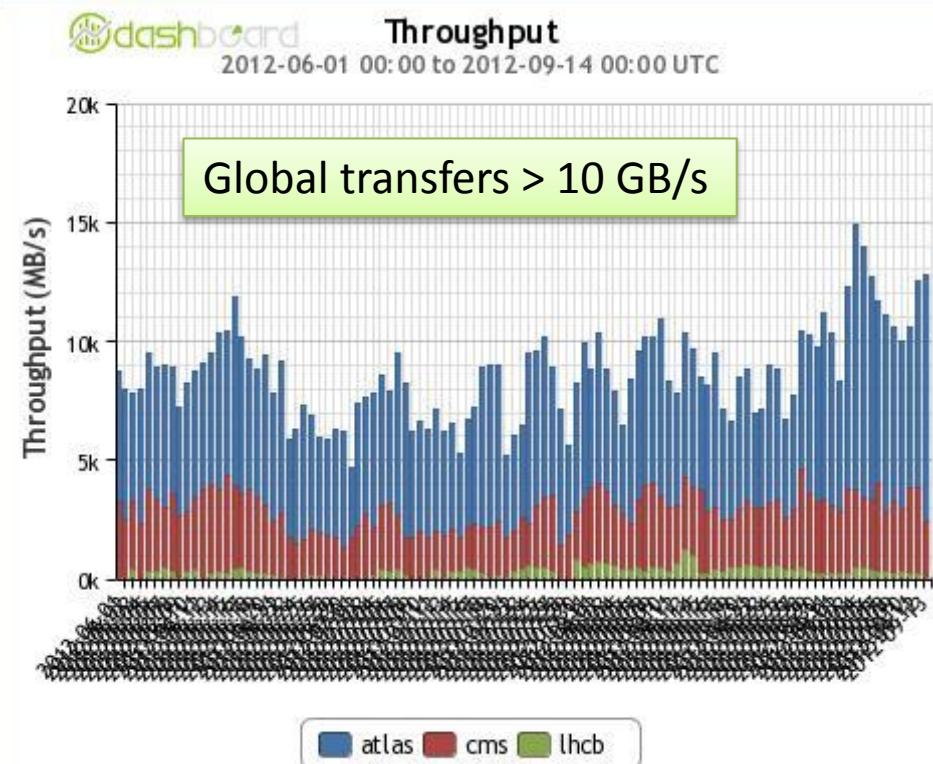

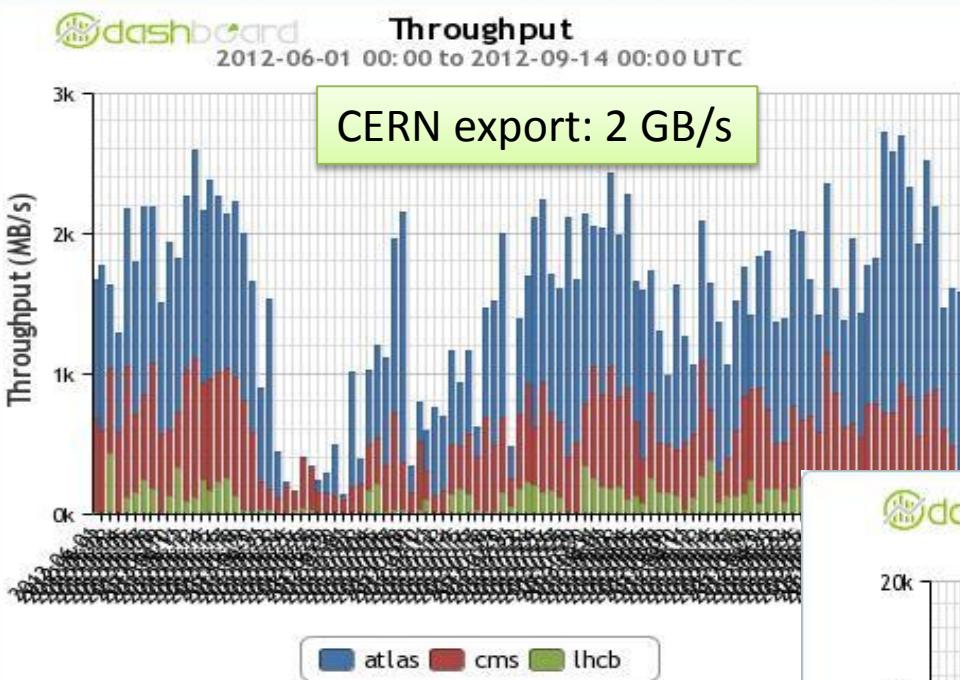

**WLCG**  
Worldwide LHC Computing Grid

### Experiments Production Data in CASTOR

# Data in 2012

# Operations

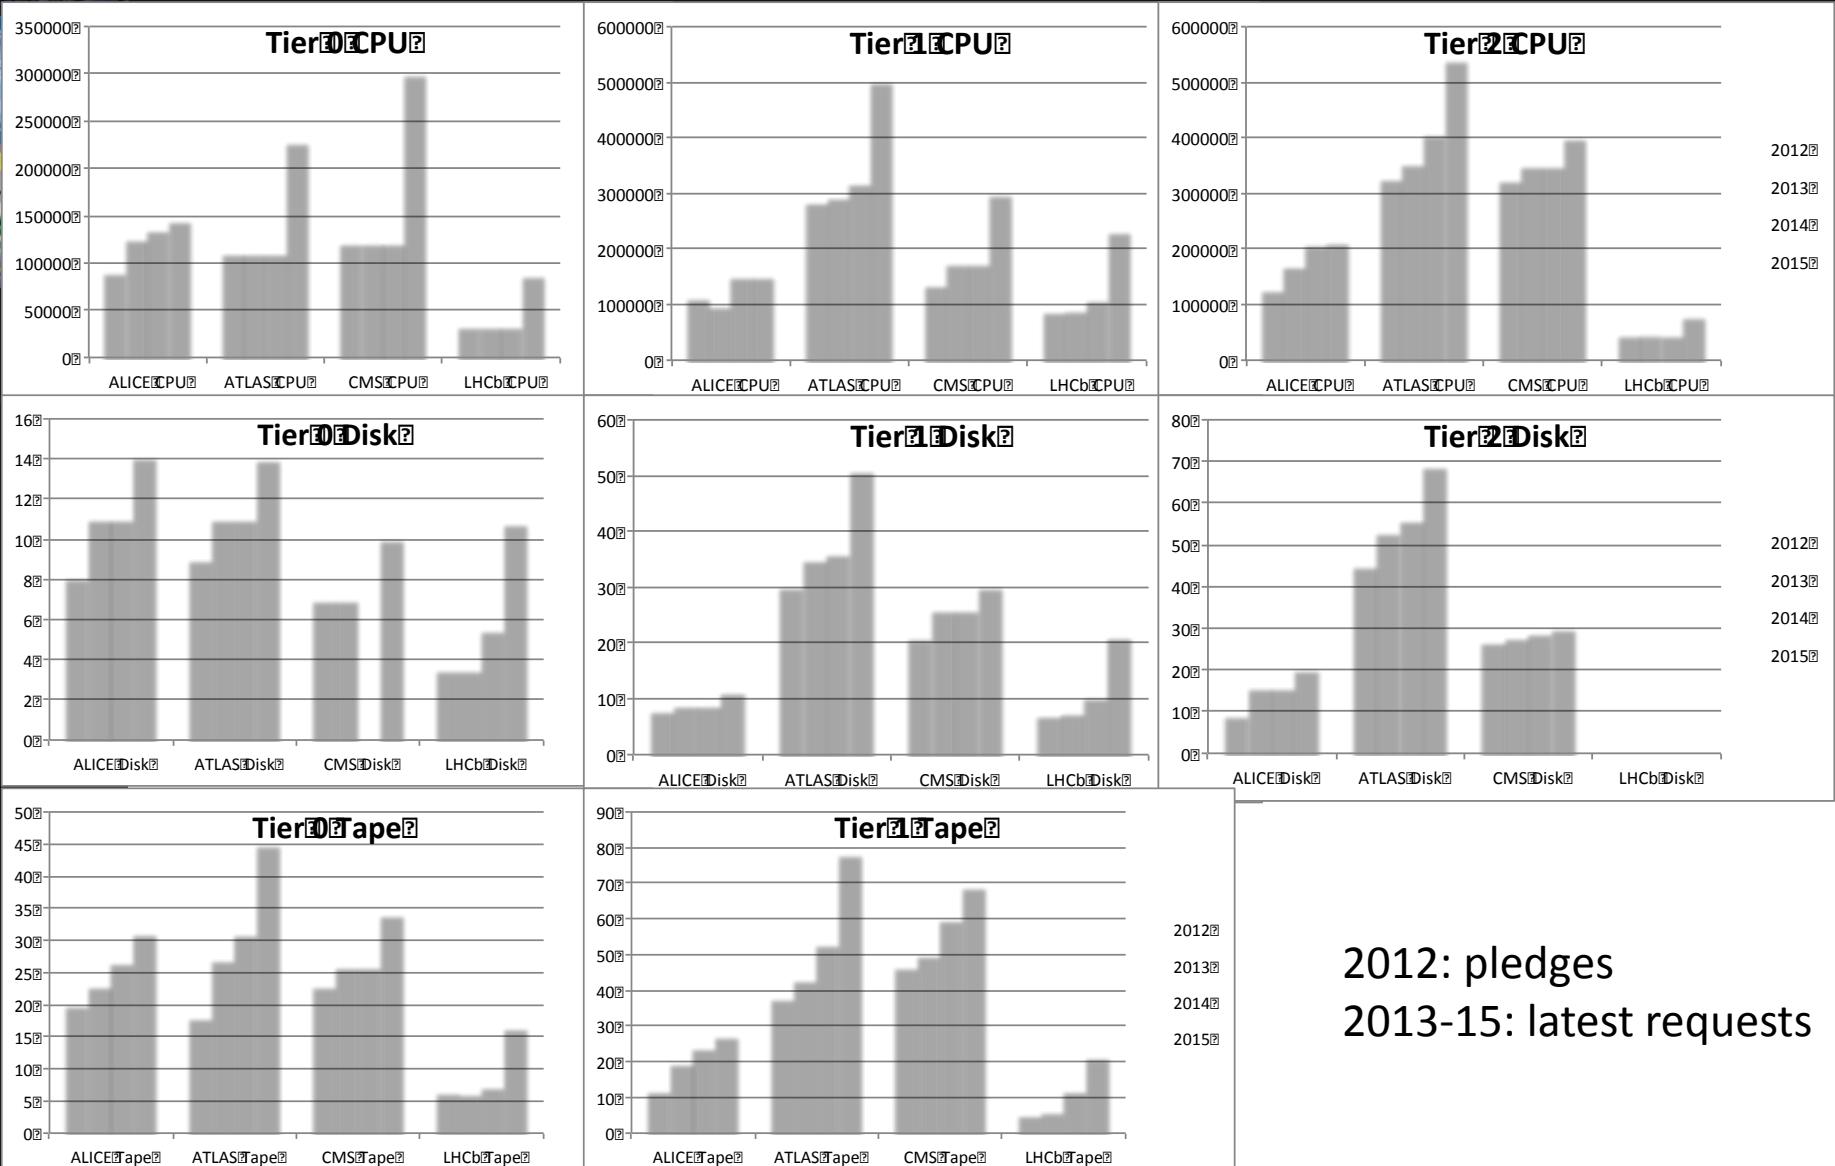

- Operations over the summer quite smooth
- No particular problems
- Ongoing LSF issue at CERN:
  - Slowdown of response – heavy user load
  - Related to scale & complexity of CERN set up
  - Some mitigations being implemented
  - Review long-term strategy

# Tier 0 upgrades

- CERN CC – extension
  - Scheduled for completion Nov 2012 – still on track
  - Required for 2013 equipment installation
- Wigner centre
  - Site visit last week – progress on schedule
  - Expect to be able to test first installations in 2013
  - Networking CERN-Wigner (2x100 Gb): procurement ongoing
  - Latency testing for 2 months
    - Fraction of lxbatch with 35 ms delay – no observed effects

# Evolution of resources

2012: pledges  
2013-15: latest requests
