

EUDET/ILC Plans for FP7

Joachim Mnich

DESY

September 2007

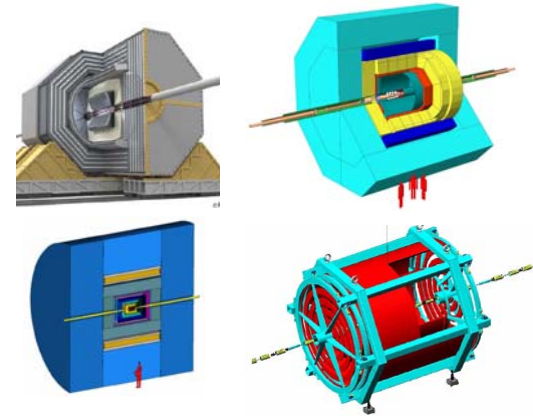

Disclaimer:

- **discussion in EUDET just started**
- **solid plans and decisions Annual Meeting (October 8-10)**
- **everything below reflects JM's private assessment**

EUDET Plans for FP7

- **Timeline ILC detector R&D**
 - LoI expected by 2009 → 2 detectors
 - EDR expected by 2010
- **Issues to be addressed as of 2009**
 - technology choices
 - engineering & integration
 - e.g. push-pull
 - industrialisation
 - testbeam
- **FP7: EUDET community will very likely submit a follow-up proposal**
 - Integrated Infrastructure Initiative (I3)
 - deadline February 15, 2008

EUDET Plans for FP7

- **Wish list / possible elements of a proposal**
 - hadron test beam (low energy?)
 - ILC-like testbeam structure
 - DAQ
 - electronics development
- **Community & resources**
 - expect almost all EUDET partners + some associates to participate
 - 30+ partners and 60+ FTE (in the I3)
 - financial resources difficult to asses today
- **Hope to have better estimates and more details early October**
