1) Development, implementation and support of databases:

- X-band RF components (completed)
- Two-beam prototype module (completed)
- SPS storage (completed)

2) Thermal tests:

- Implementation of modifications to the LabVIEW software (completed)
- Development of a LabVIEW program in order to perform a preliminary test (*in progress*)

3) Development of CLIC webpages:

- CLIC Two-Beam Module Program (*under finalization*)
- CLIC X-band Production (*under finalization*)

4) System development for creation of automatized project structures based on engineering designs (completed)
