

DPHEP6 – Proposals

Jamie.Shiers@cern.ch

DPHEP “collaboration”

- Establish a light-weight multi-lateral Collaboration Agreement
- Draft: ICFA meeting of February 2013
- Signatures: ICFA meeting of June 2013
 - At least a representative sub-set
- Most of the words are probably in the DPHEP blueprint
- Keep it as simple as possible, areas of likely change in annexes
 - Mission, mandate etc.

DPHEP Collaboration Board

- Entities that sign Collaboration Agreement appoint one (+ alternate?) member of DPHEP CB
- This could replace the International Steering Committee no later than end 2013
- Expect significant overlap – why have two?

DPHEP – Other bodies

- International Advisory Committee
- Contacts with other communities
- Propose to merge these and invite:
 - David Giaretta (APA)
 - Someone from EUDAT?
 - Carlos (EU)
 - Kevin Ashley (DCC)
 - Mirko Albani (SCIDIP-ES)
 - Etc.

DPHEP Mailing Lists

- All @dphep.org
- Collaboration Board
- IAC
- Info ?

DPHEP Reference Model

- Adopt OAIS
- Use as a common language within HEP
- And also for discussions with other communities / funding agencies
- Break down activities / plans according to this model – clearer opportunities for (inter-disciplinary?) collaboration

DPHEP Workshops

- Try to align with other relevant events?
 - HEPIX?
 - CHEP?
 - EUDAT 2013?

DPHEP Vision

- IMHO we should try to cast existing / planned DPHEP activities into a (set of) vision(s), e.g.
 - 2020 Vision: ...
 - [pre-LHC experiments + first 10 years of LHC]
 - 2030 Vision: ...
 - [LHC + upgrades + ...]
- We could organise our work into a set of “challenges” with pre-defined metrics
- Plus an orthogonal view -> functional blocks (OAI5)
