The Recurrent Sharing Problem

Alessandra Forti

Queen Mary
University of London

- The request to share something has popped out again for the Nth time in the past few years
 - This time is puppet
 - In 2007 it was more extensive knowledge/tools/rpms
 - Syadmin.hep.ac.uk created
 - Not really used by common sys admins
 - Used by WLCG monitoring (SUM tests to be clear), WLCg security, GridPP storage
- Why I insist to propose it again then?
 - GridPP storage group failure to properly distribute DPM tools since they moved
 - Some sites do share through emails
 - Last example Steve Jones script on tb-support today
 - I still distribute scripts that were uploaded years ago
 - I can still find them
