Mediterranean Open Access Network

Open Access Tracker

The **Open Access Tracker** is an open source tool built within the EU funded project MedOANet. It brings together information on the **growth** of **policies** and of different types of **open access resources** in Greece, Turkey, Italy, Spain, France and Portugal, creating a **profile** of growth **for each country**.
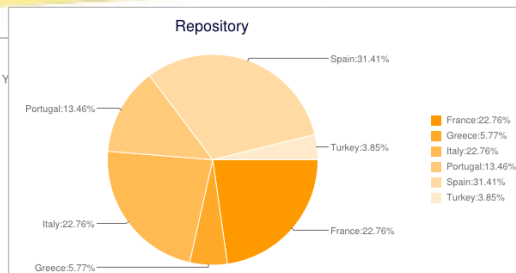

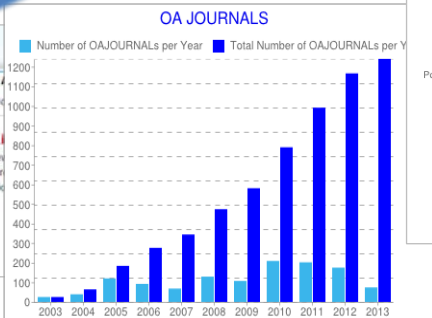

The tracker aims at **increasing the accuracy of information regarding the state of open access** in the six countries.

Sounds good... but how does it work?

The tracker draws info on journals (DOAJ), repositories (OpenDOAR), institutional policies (ROARMAP), funder's policies (SHERPA/Juliet) and publishers' self-archiving policies (SHERPA/RoMEO), and can expose data to these sources

It offers BROWSE and SEARCH functionalities.

And STATS about the growth of contents!

- France:22.76%
- Greece:5.77%
- Italy:22.76%
- Portugal:13.46%
- Spain:31.41%
- Turkey:3.85%

1282 OA journals, 299 repositories, 73 institutional policies, 208 publishers copyright policies (and related journals), and 9 funders policies (as of May 20th 2013)

Take a look at the tracker at http://www.medoanet.eu

Next steps:
- data ingestion from National sources (e.g. RCAAP & Recolecta)
- integration with OpenAIRE (emphasis on Mediterranean Countries projects)
