"What you get" – Controls

S. Jensen

Abstract

This talk will address the control system components provided by CO, in terms of 2012 performance and LS1 improvements. Consolidation activities such as ACCOR and CMW upgrade will be mentioned as will changes that affect OP programmers. Focus will be on component changes that will have a tangible impact on daily operation, including LSA performance, Logging functionalities and features of the upcoming DiaMon2 and LASER2. Finally, a number of requests from CO to OP will be presented.
