# First Stage of CKC Theory Collaboration (2009-12)

CERN TH regards the CKC Theory Collaboration as a very successful programme that helps to form the next generation of Korean theorists and that thus strengthens the ties between CERN and the Korean physics community.

CERN-Korean fellows (5 so far)

- High performance in research (39 publications in total)
- Well-embedded in activities of CERN TH  
(collaborations with staff and other fellows, seminars, ...)

Korean students

- High qualification and performance
- CERN-TH provided training via individual supervised research

**CERN TH is looking forward to continuing this programme.**

# Enhancing CKC Theory collaboration in TH Institutes

In a staff meeting on 8 October, CERN TH welcomed unanimously the idea to extend to CKC collaboration to participating professors that are involved in co-organizing TH Institutes.
