

IT requirements for the next generation research infrastructures

CERN

1st February 2013

www.cern.ch

Objectives of the event

- Explore the IT needs and procurement plans of research infrastructures from the larger physics domain that are working together in the CRISP project
- Bring together IT companies and scientists/engineers to prepare a joint technology roadmap

Agenda

Presentation of the next generations of physics scientific research instruments and their common IT needs

coffee

The vision of IT industry

lunch

Procurement plans, Knowledge and Technology Transfer

coffee

Panel: Preparing a common roadmap

Celebrating 30 years of collaboration between CERN and Oracle
