SRM2.2 deployment workshop - summary

Greig A. Cowan

University of Edinburgh

Goodbye from Edinburgh

- Apologies for the power and networking problems!

  – I'm sure there will be similar problems over the next year as we continue to deploy more storage in production!

- Check the gridpp-storage.blogspot.com for a full description (and some photos of the event).

- Kate, Jennifer, Lee, Iain, Steve and the entire NeSC team.

- GridPP, NeSC and WLCG for funding the event.

- Flavia and Maarten for helping to organise the agenda and present talks.

- DPM/dCache/StoRM/CASTOR developers for participating and preparing all of the material in the tutorials.

- All other speakers for informing us about the different aspects of SRM2.2.

- Last, and by no means least, all of the sites for coming to the workshop, asking questions, getting to know each other.

- I hope you have learned a lot from the workshop and got to know your fellow storage experts.

- It is clear that things are still developing and ATLAS/CMS are still trying to work out what they want to do with SRM2.2.

- Stay involved; ask questions on the mailing list and remember to answer those questions that you know.

- There have been a lot of pointers to other material on (t)wikis; please bookmark them.

- First data is expected next year. Storage reliability is essential.

- There is coffee and cake downstairs for those that want it.
