

# StoRM hands on session

Luca Magnoni and Riccardo Zappi INFN-CNAF

SRM2.2 deployment workshop - Edinburgh

13 November 2007

# StoRM hands on session

In this session we will put hands together on a StoRM installation:

Machines involved:

- StoRM host at INFN CNAF: **vgrid06.cnaf.infn.it** (is a virtual machine installed with Red Hat Enterprise Linux).
- User Interface from which we submit SRM request

# StoRM hands on session

## Actions:

- Present the YAIM configuration.
- Look at the StoRM configuration: Frontend, storm.properties and namespace.xml.
- Perform some tests from the UI using the SRMv2.2 CLI clients.
- Analyze the StoRM log files.
