Data archiving and data stewardship

Wednesday, 16 October 2013 11:00 (45 minutes)

Developments in data preservation and data life cycle management are having great impact the computing and storage landscape. In this talk dr Pirjo-Leena Forsström of CSC (Helsinki) will describe trends and future developments in data services for science, humanities and culture, the way these developments are being addressed by at CSC, and how this could apply to physics data.
