CERN Hotel – Improvements

1. The furniture in all apartments has been renewed
2. 2 lockable bicycle sheds are going to be installed in Saint-Genis by mid-June, in front of Building A. There is also a bicycle parking in the basement of Building C
3. The works in the 5 additional rooms in Building 39 are ongoing
4. The CERN Housing service has a new Web Page
5. The long-term waiting list is live since last Friday. See GS-AIS presentation

Dear guest,

We are pleased to confirm that status of your reservation in CERN Hotel changed.

Your reservation details:
Reservation number: 281843
Reservation status: Definitive
From 10.06.2013 to 11.06.2013 for 1 night(s)
Name: Andrey AVTOMONO
Number of person: 1
Room type: Twin Shower Building 39
Total of reservation: 64 CHF

Best regards,
Hostel Reception Team

Shuttle Service

1. In 2012 nearly 110,000 passengers were transported, i.e. an increase of 18% compared to 2011.

2. In 2013, we have a 9% decrease compared to 2012 during the same period (January 2013 – 24th of May) i.e 37,746 passengers in 2013 against 41,787 in 2012.
IMPORTANT NOTICE: CANCELLATION OF SHUTTLE CIRCUIT 3

Circuit 3 of the CERN Shuttle Service (Point 5), which has served CMS since the start of LS1, will be cancelled with effect from Tuesday 16 April. This decision has been taken in consultation with CMS, as the circuit was seldom used.

In response to increasing demand for Circuit 1 - Meyrin and feedback from passengers, the two Circuit 3 journeys will be switched to Circuit 1 – Meyrin (see new timetable below):

- **Mornings**: Four journeys instead of three. Circuit 1 now starts at 8:10 (instead of 8:19 a.m.) and runs until 9:27 a.m. (instead of 9:16 a.m.).
- **Lunchtimes**: Five journeys in place between 12:10 p.m. and 1:47 p.m.
- **Evenings**: Circuit starts at 5:23 p.m. (instead of 5:05 p.m.) and ends at 6:20 p.m. at Building 33. Please note that the circuit will depart from Building 13 instead of Building 33.

---

**Circuit 1 Meyrin**

**Monday – Friday (except CERN official holidays)**

**Saturday – Sunday (except authorized CERN staff)**

Cafeterias & Snack Service

Building 6

Building 30

La 3D, le projet.
Cafeterias & Snack Service

1. Wider range of products in the vending machines
2. Fresh items
3. 16 additional vending machines deployed CERN wide
4. 3 additional Nespresso machines before the end of the year
A second entrance for pedestrians and cyclists on Route du Maroc will be opened and the existing entrance on Chemin du Moulin des Ponts will be re-opened:

- for the period 2 April to 31 October 2013,
- from 7.00 a.m. to 9.00 a.m. and from 5.00 p.m. to 7.00 p.m. on working days (Monday to Friday).

IMPORTANT: all users must show their access cards to the security guard as a matter of course when passing through the gates, both on entering and leaving the site.
Entrance C on the Meyrin site, which drivers of motorised vehicles can use between 7 a.m. and 9 a.m. and between 5 p.m. and 7 p.m. Mondays to Fridays, has been altered to include a turnstile to allow cyclists and pedestrians to use their access card to get in and out of the site between 6 a.m. and 10 p.m.
Bicycle entrances – Meyrin

New bicycle entrance near Gate D?
Agreement from the French and Swiss Customs to be sought.
This issue has to be put in perspective with general issue of transfrontier mobility for all the people living in the local area.
Bicycle path between Meyrin and Prevessin sites

1. Around 800 kCHF project supported by CERN and all French local authorities involved
2. Technical drawings finalised and approved
3. Planning hopefully agreed in October
4. Objective: 2014 provided resources are provided by all parties involved.

Network of present and future bicycles paths in the Canton of Geneva and the Pays de Gex:
- **green lines** and bicycles paths connected to **public transportation network**.
Green Space Management

CERN IN “NATURE”

CERN is nestled within a verdant natural environment which, thanks to a conservation-oriented policy, is characterized by a remarkable biodiversity. The continued protection of that diversity calls for thoughtful, carefully planned measures.

CERN’s site is an extensive one: its 650 hectares include 210 hectares of buildings, roadways and parking lots, 100 hectares of fenced-off green area, and 340 hectares of non-fenced land, a patchwork of fields, woods and pasture. This land teems with a great variety of plants and animals, including some rare and unexpected species. In 2009 CERN received a certificate from the Swiss foundation Nature & économie for the Meyrin site, and the award was renewed in 2012 for three more years.

The green spaces inside the fenced area are tended by six ISS gardeners, whose duties also include keeping the sidewalks and footpath clear of snow in winter. The Meyrin site also includes orchid sanctuaries, meadows and sheep pastures. Around twenty orchid areas have been identified (see the map below), covering approximately 3 hectares in all, making our site one of the richest in the entire canton, counting no fewer than 19 different species,” explains Mathieu Fontaine, who is in charge of managing the green spaces at CERN (GS Department).

In 1996 CERN signed a convention with the French forest authority, the Office national des forêts or ONF; the Convention, which was renewed in 2010, concerns the management and conservation of CERN’s woods and measures to protect and preserve the banks of the Lion stream. The woods belonging to CERN are home to many species of tree: oak, ash, wild cherry, hazel and hawthorn. The terms of the convention have been broadened to allow the ONF to start an inventory of the trees on the Prévesin site to determine the size, composition and state of health of the tree population. Cut wood is provided to the Pays de Gex community of municipalities as biomass for power generation. CERN’s forests are among the last bastions of natural woodland in the Pays de Gex plain, so they are of particular significance in terms of conservation.

Concerns about safety on the site made it necessary to cut down those trees that had become a hazard. Two thirds of the trees in a dangerous state were cut down in two campaigns that ran from 2010 to 2013, and the remaining third will be cut down during the winter of 2015-14. Restoration work will begin within the next few weeks (depending on the weather), starting with the lots situated alongside the Bloch, Bakker and Salam roadways. Planting of trees, shrubs, grasses, perennials and so on will begin in the autumn, as will the construction of footpaths. The orchid sanctuaries will be preserved, and parcels will be set aside as lawns and meadows. All of this will contribute to a complete rethink of the approach to landscaping at CERN.
Many thanks for your attention!
