Status of the Health Insurance Project for Users

Pierre Bonnal
Risk & Insurance Manager
CERN DG-DI

Doris Chromek-Burckhart
Head of CERN Users Office
CERN PH-AGS-UO

102nd ACCU Meeting
4th December 2013
Previous Milestones

- **ACCU #98**
  - 2 schemes with *collective* contracts

- **ACCU #99**
  - CHIS/UNIQA health insurance scheme → for MPE’s
  - Not designed for MPAs, not suited for MPA’s (users)

- **ACCU #100**
  - Result from a survey initiated by the User’s Office
  - Revised requirements + preliminary market survey

- **ACCU #101**
  - A proposal matches many of *our* requirements
In the meantime 1/2

• Review of Allianz Worldwide Care (AWC) proposal with:
  • CERN Legal Service
  • Chairman of the CHIS
  • CERN Medical Service

• The concept of “urgent care” is perceived as a major risk for the sustainability of this scheme by these experienced stakeholders

• This is confirmed by NATO HQ in Brussels (which are AWC customers)
In the meantime 2/2

- NATO HQ provided us elements of their contract
- Early November, AWC and brokers were asked to review their proposal based on these new requirements
- No revised proposal yet
- There is still the exclusion of pregnancy cares that shall be carefully looked at
Conclusion

• We are progressing slowly but safely:
  • There are not many insurance companies interested in providing such a service
  • We shall safeguard the only one who is still interested in offering this very unusual insurance service
  • But we shall absolutely set up a scheme that fulfills sustainability and diversity requirements

• New tentative date for service into operation: Early March 2014
Special thanks to M. Yann Delessert and Kessler’s Experts for their investigations and to Doris Chromeck-Burckhart for her help in triggering requirements

Thank you for your attention
