From Savannah to JIRA

Tuesday 12 March 2013 18:45 (15 minutes)

Savannah bug-tracking system retires. A new system –JIRA will replace it. I will report the current status of ROOT project migration in JIRA. Also I am going to describe details of how to use JIRA and what are the advantages of it. I will give details of the new functionalities that can facilitate ROOT users in the working process.
