## **Search for new physics in multijet final states**

*Thursday 18 July 2013 09:45 (12 minutes)*

The latest results on new physics searches in multijet final states are presented. Searches for new physics with dijets, b-tagged dijets, dijet angular distributions, dijet pairs, and jet triplets are all considered. Also presented will be the search for TeV-scale gravity in two complementary final states: high jet multiplicity final states and the inclusive jet search for extinction.
