CP violation in charm decays at Belle

Thursday 18 July 2013 15:30 (15 minutes)

We report the measurements of mixing parameter y_{CP} , of a CP violating parameter A_Γ and of a time integrated CP asymmetries A_{CP} in decays $D^0 \rightarrow K^+ K^-$ and $\pi^+ \pi^-$ using the Belle final data sample of 976 fb^{-1} .
