## Measurement of $\phi_s$ at LHCb

*Saturday 20 July 2013 11:15 (15 minutes)*

The study of CP violation in  $B_s$  oscillations is one of the key goals of the LHCb experiment. Effects are predicted to be very small in the Standard Model but can be significantly enhanced in many models of new physics. We present the world's best measurement of the CP-violating phase  $\phi_s$  using  $B^0_s \rightarrow J/\psi\phi$  and  $B^0_s \rightarrow J/\psi\pi\pi$  decays, and first study of related measurements in other decay modes.
