

**Session Program**

**3-5 Dec 2012**

**RD51 mini week**

***WG2 - Physics issues***

CERN, 216/R-401 - Salle polyvalente PUMP HALL

# Tuesday 4 December

14:00

## WG2 - Physics issues

**Session** | **Location:** CERN, 216/R-401 - Salle polyvalente PUMP HALL | **Conveners:**  
Harry Van Der Graaf, Maximilien Chefdeville

14:00-14:20

### A quantum efficiency enhancement of CsI-TGEM/RETGEM -based RICH prototype

**Speaker**

Vladimir Peskov

14:20-14:40

### Updates on the double phase Ar LEM-TPC

**Speaker**

Devis Orlando Lussi

14:40-15:00

### Pion calorimetry with 1x1 m<sup>2</sup> Micromegas chambers

**Speaker**

Maximilien Chefdeville

15:00-15:20

### First results on the combination of a THGEM and a MICROROC readout

**Speaker**

Maximilien Chefdeville

15:20-15:40

### Coffee break

15:40-16:00

### Recent Ingrid Studies and DESY Test-Beam Results with Octopuce

**Speaker**

Andrii Chaus

16:00-16:20

### Low Background Micromegas X-ray Detectors in CAST Experiment

**Speakers**

Javier Gracia Garza, javier gracia

16:20-16:40

### Latest large GEM test beam results

**Speaker**

Christopher Armaingaud

18:00
