

Wide Area Network Data Access Requirements in Analysis

Wednesday 15 May 2013 13:45 (45 minutes)

- Data movement in end-to-end analysis work flows
- Implications of the new analysis model proposed by the Analysis Model Study Group
- How much data do we replicate through PD2P (for long-term usage) vs. planned replication? What would be the right mix in the future given limited disk space?

Presenter: BENJAMIN, Doug (Duke University (US))

Session Classification: Networks in Production and Analysis Workflows
